**FUEL CELL DEVICE CAPABLE OF OUTPUTTING SIGNAL REPRESENTING A  
RESIDUAL CAPACITY, METHOD FOR OUTPUTTING A SIGNAL REPRESENTING  
A RESIDUAL CAPACITY OF A FUEL CELL DEVICE, AND ELECTRONIC DEVICE  
CAPABLE OF DETECTING A RESIDUAL CAPACITY OF A FUEL CELL DEVICE**

Examiner: Adam Arciero      S.N. 10/563,719      Art Unit: 1795      September 18, 2009

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-5, drawn to a fuel cell device capable of outputting a signal representing a residual hydrogen amount.

Group II, claims 6-10, drawn to a method for outputting a signal representing a residual fuel cell capacity in a system.

Group III, claims 11-14, drawn to an electronic device capable of detecting a residual capacity of a fuel cell device.

Group IV, claims 15-18, drawn to a method for detecting a residual fuel cell capacity of an electronic device.

2. The inventions listed as Groups I, II, III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I, II, III and IV contain the same technical feature of a pressure detecting unit for detecting a pressure of the hydrogen supplied to the power generating section of a fuel cell device. ITO et al. (JP 2003-139298) teaches the technical feature of a pressure detecting unit for detecting a pressure of the hydrogen from a tank and supplied to the power generating section of a fuel cell (Abstract). There is a lack of unity *a posteriori*, since such technical features are not applicant's contribution over the prior art.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so**

**may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
